And another thing. The survey does exactly what we don't want it to do. It asks if residents want a recreation facility but doesn't include what that would cost. Now you'll have many many many residents that will indicate they want a rec facility but when we ask for a levy, they will be mad as their expectations have already been set.

Jane: attached is a first draft version of the proposed Parks Survey. Trent has distributed this to us and the Board members for review and comments. We will then reconnect with the consultants to discuss the comments, concerns, proposed changes etc... let me know if you have comments. Thanks

**Subject:** RE: park survey

Hi Trent,

Here's the first draft of the survey. The next step is to have your staff review the survey and update the specific choices so that the survey is customized for the City of Hudson.

There are two other items that we'll need before we can start administering the survey:

- 1) GIS shapefiles that show the boundaries of the City
- 2) A signed cover letter on City letterhead

The cover letter is mailed along with the survey, and it's used to describe the purpose of the survey, and encourage residents to fill out the survey. The cover letter will also contain a link to an online version of the survey, for those who prefer to complete the survey online. I've attached a couple of cover letters that you can use as a template. For your survey, we'll use the following URL for the online survey: [www.hudsonsurvey.org](http://www.hudsonsurvey.org).

Let me know if you have any questions or would like to setup a call to discuss the survey in more detail.

Thanks!  
Jason
